

TEST TASK

Full Stack

Full-time

CREATE A TRAIN SCHEDULE APPLICATION 🚄

MAIN REQUIREMENTS

- 📌 Set up the projects (Front-end and Back-end).
- 📌 Connect a database to your backend server.
- 📌 Create a few pages and backend for them.
- 📌 Make simple authorization and authentication (password, jwt).
- 📌 Deploy server to cloud (Heroku, AWS, etc.).

TECHNOLOGIES STACK

- 📌 Language: TypeScript.
- 📌 Server: Node.js (Nest.js).
- 📌 Database: PostgreSQL.
- 📌 Front-end: React.js. It's nice to use Next.js.

REQUIRED REQUESTS

- 📌 GET
- 📌 POST
- 📌 DELETE
- 📌 PUT
- 📌 PATCH

EXPECTED RESULT

- 📌 An application with a train schedule that can be authorized, edited, deleted, updated, and sorted. There must be a search field available. Once the task is completed, please upload it to GitHub and send us the link. UI/UX Design is at your discretion.

DEADLINE

- 📌 The deadline for this task – 3 days.
